Password Importance

Anyone with a computer or an internet account is vulnerable to hacking, viruses and identity theft. Therefore, computers and accounts must be protected by a strong password

Qualities of a strong password

- Easy to remember.
- You don't need to note it down.
- Easy to type.
- A mix of letters, numbers and symbols.

Creating a strong password

- Use at least 8 characters.
- Mix at least 3 of the followings:
 - Capital letters (ABC).
 - Small letters (abc).
 - Numbers (0-9).
 - Special characters (�%?"!*)
- Deliberately misspell dictionary words.

How to Use Password Phrases

- Don't Make Your Password Too Obvious.
- Don't Make Your Password Too Short.
- Don't Use Common Dictionary Words.
- Don't Use the Same Password Over and Over Again.
- Using Misspelled Words.
- Numeric Substitutions.
- Different accounts different passwords.
