## Usage guidance

Lots of people use the internet for different things. Students & researchers use it for information. Business people use it for business. Others use it for fun.

- ❖ Tell your parents if you read on the net something that makes you uncomfortable.
- ❖ Remember that people online may be something different than what they claim.
- ❖ Do not meet someone without the permission of your parents.

# General Tips

- Respect the others.
- Explore constructive stuff.
- Use it moderately.

## What to avoid?

- ❖ Uploading personal photos.
- ❖ Putting home address, phone number, school name on the net.
- ❖ Meeting chat room friends without telling your parents.

## Do you know?

The internet is a vast virtual world, full of wonderful things, but it is open, like chatting in the street. So be careful! Don't give personal information unless you know exactly with whom you are communicating.

# DO & DON'T

## DO:

- Visit only known & respected websites.
- Be careful when downloading programs & games from the net.
- Scan for viruses before opening any file.

## DON'T:

- Don't visit suspicious sites.
- Don't infringe upon the privacy or personal rights of others.
- Don't help spreading viruses and spyware.
